

Nikon JOBS Workshop at FILM

24th – 30th November

Nikon will be holding a five day workshop at FILM, Imperial College London, to showcase the new High Content System, Nikon Eclipse Ti-E with C2 Confocal, located in the FILM.

The High Content system has JOBS software which enables easy creation of more complex and custom experimental templates, from image acquisition to analysis, without the need of advanced data programming knowledge and the need for creating a macro.

For more information or to book a time slot on the workshop please contact:

Emily Doyle and Natalia Alexander
